

Practical-1

Project Scope & Identity

The **StudentHub Portal** solves the problem of campus fragmentation. Students struggle with scattered academic resources, isolated communication channels, and disjointed event tracking. This portal centralizes academic, social, and administrative campus life into a single, cohesive dashboard.

User Roles

- **Students:** Access courses, track grades, join groups, and view campus events.
- **Faculty:** Manage course materials, input grades, and communicate with students.
- **Administrators:** Manage user accounts, approve campus organizations, and post official announcements.

Key Modules

- **Academic Control:** Course management, assignment tracking, and grade books.
- **Community Hub:** Club directories, study group finders, and discussion forums.
- **Campus Life:** Event calendars, campus news feeds, and facility booking.

Navigation Flow

[Login/Landing]

|

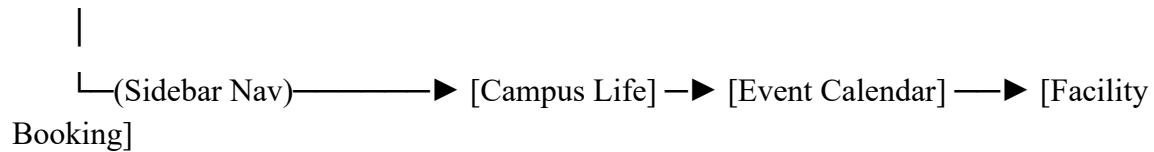

[Dashboard] —(Top Nav)—▶ [Profile/Settings]

|

|—(Sidebar Nav)—▶ [Academics] —▶ [Course Detail] —▶
[Assignments/Grades]

|

|—(Sidebar Nav)—▶ [Community] —▶ [Club Directory] —▶ [Club
Detail/Forums]

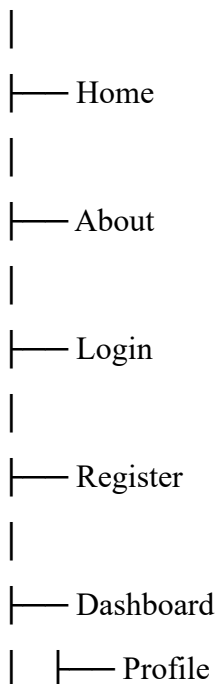

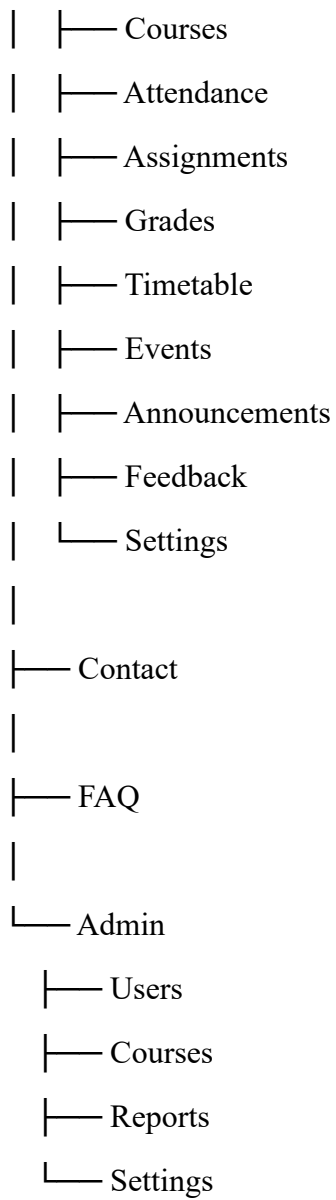

Core Pages

1. **Landing / Auth Page:** Public gate with login and registration.
2. **Central Dashboard:** Personalized widgets for schedule, notifications, and quick links.
3. **Course Directory:** Grid view of enrolled and available courses.
4. **Course Detail Page:** Lecture slides, syllabus, and module breakdowns.
5. **Assignment Tracker:** Submission deadlines, status flags, and grading feedback.
6. **Club Directory:** List of campus organizations with search and filter tools.
7. **Club Detail Page:** Announcements, member lists, and join request buttons.
8. **Event Calendar:** Monthly interactive view of campus-wide and club activities.
9. **Facility Booking:** Reservation system for study rooms, labs, and equipment.
10. **User Profile:** Academic record summary, personal settings, and privacy toggles.

StudentHub Portal

Overview

StudentHub is a centralized academic management portal designed to help students, faculty, and administrators manage academic activities efficiently.

Features

- User Authentication
- Dashboard
- Profile Management
- Course Management
- Attendance Tracking
- Assignment Submission
- Grades & Results
- Timetable
- Events & Announcements
- Feedback System
- Admin Panel

Technologies Used

- HTML5
- CSS3
- JavaScript
- Bootstrap
- Git & GitHub

Project Structure

```

StudentHub/

├── public/

├── src/

├── docs/

├── README.md

└── package.json

```

Installation

```bash

git clone https://github.com/yourusername/StudentHub.git

cd StudentHub

```

Open `index.html` in your browser to run the project.
